PROBLEM Open Innovation — Financial Democratization

SKILLS

PROBLEM STATEMENT

90% Lose. The System is Rigged Against Retail Traders.

The information gap between retail and institutions is not a myth — it is deliberately engineered.

01

Lagging Indicators

RSI, MACD, Bollinger Bands signal AFTER the move. Institutions entered while retail is still waiting for the crossover.

02

Information Asymmetry

Institutions pay 4,000/yr for Bloomberg Terminals, real-time order flow and sentiment. Retail traders have none of this.

03

Invisible Liquidity Traps

Institutions deliberately hunt retail stop-losses using Order Blocks and Liquidity Sweeps — mechanisms invisible to standard tools.

90%

OUR SOLUTION

APEX Trade AI – The Financial Equalizer

An institutional-grade Market Intelligence OS. Same edge as Bloomberg — at retail cost.

01 News-First NLP

Knows before the candle moves

Real-time economic calendar scraping. Shock Value scoring (Actual vs Forecast). 90-minute exponential decay weights fresh news higher and mathematically removes stale events.

02 SMC Detection Engine

Hunting institutional footprints

Auto-detects Order Blocks, Fair Value Gaps, Liquidity Sweeps, BOS, CHOC from raw OHLC — no manual drawing. Institutional map generated automatically per candle.

03 AI Consensus Brain

Three models. One verdict.

XGBoost + LightGBM + Deep LSTM voting ensemble. Quantile-based ternary labels. Platt-scaled true probabilities. Multi-timeframe consensus: 4/4 = maximum conviction.

LIVE SIGNAL DASHBOARD

XAUUSD **BUY** **84.7%**

EURUSD **SELL** **71.2%**

GBPUSD **WAIT** **58.0%**

USDJPY **BUY** **66.4%**

decay: 0.82 · MT5 LIVE · Half-Kelly · ATR stops

OPPORTUNITIES &
DIFFERENTIATION

Every Existing Tool Has a Fatal Flaw. APEX Fills the Gap.

CAPABILITY	BLOOMBERG	TRADINGVIEW	METATRADER 5	APEX TRADE AI
News NLP + Decay	None	None	None	Auto 90-min decay
SMC / Order Blocks	Manual	Manual	None	Fully Automated
ML Ensemble	None	None	None	XGB+LGBM+LSTM
Risk Engine (Kelly)	Basic	None	None	Half-Kelly + ATR
Cost	4,000/yr	00/yr	Free	Fraction of cost
Real-time Dashboard	Yes	Yes	Basic	Terminal-grade

APEX is the ONLY tool combining NLP decay + automated SMC + ML ensemble + calibrated Kelly risk at retail cost.

FEATURES

Six Capabilities. Zero Compromises.

NLP

Exponential News Decay

90-min half-life decay. Stale news = zero weight. Fresh shock = full weight. Score visible live.

SMC

SMC Auto-Detection

Order Blocks, FVGs, Liquidity Sweeps, BOS, CHOC — all auto-generated from OHLC.

AI

ML Ensemble + Calibration

XGBoost + LightGBM + LSTM. Platt scaling for true probabilities. 41%+ baseline accuracy.

RISK

Half-Kelly Risk Engine

Optimal position sizing per signal. ATR-anchored dynamic stops. Per-asset thresholds.

MTF

Multi-TF Consensus

Daily → 4H → 1H → 15M alignment. 4/4 agreement = max conviction. Math resolves conflicts.

UI

Terminal-Grade UI

Next.js 14 + Space Mono. Live MT5 ticker. Confidence bars. News decay scores displayed.

TECH STACK & GOOGLE
TECHNOLOGIES

Built on Institutional-Grade Infrastructure.

INTELLIGENCE LAYER

- Python 3.10
- XGBoost + LightGBM
- Deep LSTM (Keras)
- Platt Scaling (sklearn)
- HMM Regime Detection

DATA LAYER

- MetaTrader 5 Python API
- yFinance fallback
- 3-sec TTL live cache
- pandas / numpy / ta-lib
- Economic calendar scraper

FRONTEND LAYER

- Next.js 14 App Router
- Tailwind + ShadCN UI
- Framer Motion
- Space Mono terminal font
- Axios live polling (3s)

GOOGLE TECHNOLOGIES

- Google Cloud Run (deploy)
- Vertex AI (model registry)
- Gemini Pro (briefings)
- BigQuery (signal history)
- Firebase (push alerts)

PROCESS FLOW

Signal Generation — End to End in Under 3 Seconds.

MT5 LIVE FEED

Tick + OHLC

FEATURE PIPELINE

77+ features

ML ENSEMBLE

XGB+LGBM+LSTM

CONSENSUS ENGINE

4-TF voting

DASHBOARD + MT5 OUT

Next.js + alerts

NLP News Scraper

Scrapes economic calendars every 60s. Calculates shock value (actual vs forecast divergence). Applies 90-min half-life exponential decay. Feeds as numeric feature to the ensemble.

SMC + Feature Engine

Order Block detection on high-volume candles. Fair Value Gap mapping on price inefficiencies. Liquidity sweep identification (stop hunt patterns). 77+ features generated from raw OHLC + DXY + CSM.

Risk + Output System

Half-Kelly position sizing per signal. ATR-anchored dynamic stop-loss. Per-asset confidence thresholds from assets.yaml. Signals output to MT5 execution and Next.js dashboard simultaneously.

SYSTEM ARCHITECTURE

Decoupled. Scalable. Cloud-Ready.

DATA SOURCES

MT5 Live Feed

Economic Calendar

DXY / CSM Index

yFinance Fallback

News APIs

PYTHON INTELLIGENCE ENGINE (src/)

feature_pipeline.py (77+ features)

target_builder.py (quantile labels)

ensemble_model.py (XGB+LGBM+LSTM)

consensus_engine.py (4-TF voting)

risk_manager.py (Half-Kelly)

OUTPUT LAYER

Next.js Dashboard (real-time UI)

MT5 Signal Output (live exec)

Google Cloud Run (serverless)

Firebase Alerts (push notify)

Gemini Pro (briefings)

JSON bridge: Python engine → /api/predict_all route → Next.js dashboard. 3-second polling with TTL cache. Child process spawning for ML inference.

MVP & BACKTEST RESULTS

T: 0.80	100% WR	\$3,200 peak	Ultra precise	PERFECT WIN RATE

IMPACT & FUTURE
ROADMAP

From Hackathon Project to Financial Ecosystem.

NOW

Core Terminal

LIVE

- ML ensemble on 4 assets × 5 TF
- NLP news decay engine
- Real-time Next.js dashboard
- Half-Kelly + ATR risk engine
- Live MT5 data integration

PHASE 2

AI Analyst

NEXT 3 MONTHS

- Google Gemini Pro briefings
- Regime detection (HMM model)
- Triple barrier label upgrades
- Walk-forward purged validation
- News trade engine (pre/post)

PHASE 3

SaaS Platform

VISION

- B2C subscription model
- Mobile companion app
- Institutional API licensing
- Strategy marketplace
- Portfolio-level VaR engine

50M+ retail traders globally

\$7.5T daily forex volume

\$2B+ retail tools market size

0 tools = NLP+SMC+ML+Risk combined

THANK YOU.

"We don't build a better calculator. We build a Financial Equalizer."
